Other low value _____

Supershots (sum of *) = $\frac{84}{296} = 28 \%$

*Other high value _____

Conductor (C + C/B) = $\frac{74}{296} = 25 \%$

Total Clip Count 296

Performance Notes: Following arm-pit rule on realistic soloist shots. Has good # of large-screen shots, but too short!! Banse is feisty!! The mix of shots is good & the video passes the supershot test. But it flunks the pace test and the conductor shot test. So this segment winds up with a C for DVD it is. I would raise this to a B for SQ. But the subtitles are confused -> B-
